

Whippendell Marine

Standard Products

Standard Products

Company Profile

In August 2007 Whippendell Marine Ltd. acquired the AC Standard Products business of Allenwest Ltd. and created the Whippendell Marine Standard Products Division.

A modern factory unit, situated on the south coast of England, has been fully equipped with all the necessary machinery and test equipment required to manufacture the product range to the same exacting standard that Allenwest Products have always been respected for.

Experience

Our facility is staffed by ex Allenwest employees, who between them have over 175 years of technical and manufacturing knowledge and experience, and can also draw on Whippendell Marine's own extensive experience.

Investment

Whippendell Marine Ltd. have made a substantial investment in material and component stock to ensure all popular products are available off the shelf, and that more specialised requirements are available on short lead times.

Our staff are ready and available to discuss your requirements or provide technical assistance as required.

Product Range

The products manufactured by the division are:

- AC Westmaster Contactors to 400kW
- Contactor Spares
- Westmaster Thermal Overload Relays
- Type R Thermal Overloads & Heater Packs
- Shockproof Contactors
- Powerline 2 Motor Starters
- Westline Motor Starters
- Resistance Units
- PB1N Pushbutton Stations

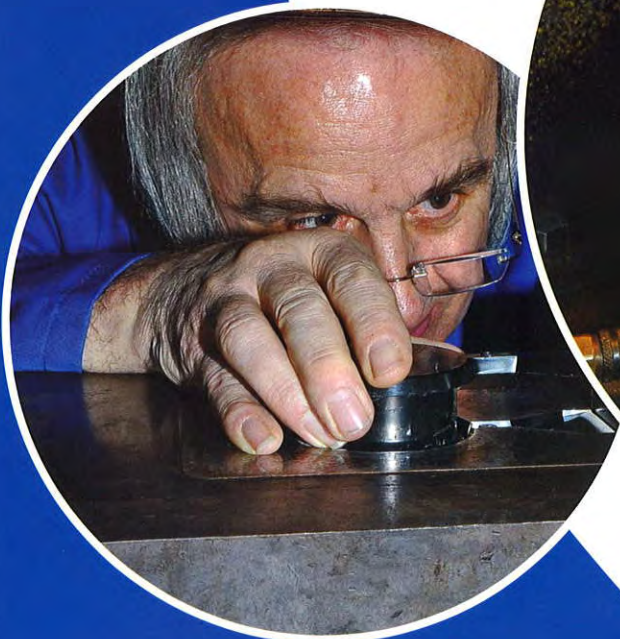

For detailed product information, please see the website www.whippendell-marine.co.uk/StandardProducts.html, or contact our sales staff.

Manufacturing Facilities

In house manufacturing facilities include:

- Magnet Manufacture
- Coil Winding
- Coil Encapsulation
- Press Work
- Resistance Winding
- Starter Wiring
- Overload Heater Winding
- General Assembly

In addition the division can call upon the substantial manufacturing capability at Whippendell Marine's Watford site.
